The Technology of Possibility

Complete Card Management Solutions

IDPro7 Software

Payne Security has **over 30 years experience** within the **ID card market** and it is with this wealth of experience and knowledge that has led to the creation of their **IDPro7 Card Production Software**.

IDPro was originally created in 1996, but with constant liaison with customers to understand their card issuance problems and needs, IDPro has continued to develop. With IDPro7 now being the most comprehensive card production software suitable across various market sectors such as; **Education, Healthcare, Local Authority, Government and Business**, to provide data capture, including photo images to produce ID cards for a wide variety of applications.

IDPro7 making in-house card issuance a simpler and more streamlined process:

- Providing true flexibility
 - can tailor systems to suit your requirements
 - networking capability from MIS systems to stand alone systems
 - linking applications such as Time & Attendance or Human Resources systems
 - the ability to integrate across various databases and networks
 - Microsoft.Net based
- Pre-defined screens, databases and card designs
- Unique tailored options to further define the software to suit your needs
- Tick box graphics, to verify additional meaningful information
- A wide variety of image capture available
- Quick and efficient image and data capture
- Design rich to produce multiple card types
 - library cards
 - travel permits
 - cashless vending
 - traditional ID
 - taxi licences
 - proof of age
 - employee cards
 - visitor passes
 - qualification verification (fork lift drivers, first aiders etc)
 - and much more
