

The Technology of Possibility

Complete Card Management Solutions

Healthcare Cards

Payne Security has **over 30 years experience** within the **ID card market** and it is with this wealth of experience that they provide a range of ID card solutions to suit your healthcare card requirements.

We understand the difficulties faced by many healthcare facilities. To capture staff photographs and details is a logistical minefield, in terms of time (your personnel), resources (training staff to use equipment) and money.

So easing collection of cardholder details, including photographs and the ability to incorporate any of the current card technologies, along with offering secure print features means **Payne Security produce an ID card that is more secure, durable and functional.**

That's why Payne Security now **supplies to over 40% of the UK healthcare market**, incorporating the NHS, primary care trusts, hospitals and the private sector as well as into Europe.

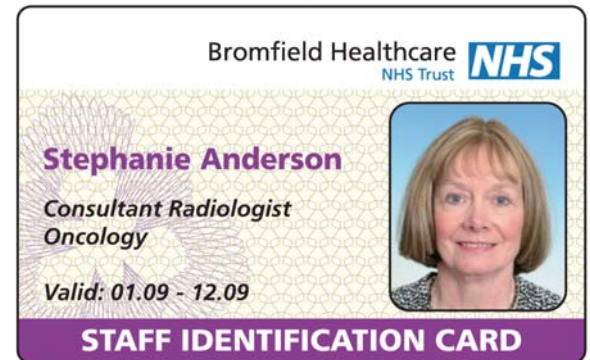

Payne Security not only provide ID cards, using its unique digital print facilities, but can also provide complete fulfilment services, mailing cards directly to your staff or to your healthcare centre.

As a leading supplier of in-house ID card printers and utilising our sophisticated IDPro7 software, we can provide you with the in-house card print and issuing system that suits all your ID card requirements.

Payne Security gives you the advantages of:

- Short to medium print runs - it's our forte!
- Secure print features - guilloche, UV print, microtext and optically variable devices
- All print encapsulated under top laminate - more durable and secure card
- Personalised data added at time of print - no additional process
- Multiple designs printed simultaneously
- Quick turn-around times - days not weeks
- All card technologies - magnetic stripe, barcode, RFID (contactless), Smart (chip)
- Braille - meeting the DDA legislation
- Complete card fulfilment service
- Mailing cards direct to cardholder
- IDPro7 facilitates data capture and validation
- A multifunctional tool for the cardholder
- Large format ID cards available - easier to read

Healthcare Cards

Whatever your ID card scheme needs, Payne Security has the solution to match.

Complete Card Management Solutions

Healthcare Cards

ID Cards

The issuing of ID cards within the healthcare sector has grown dramatically. Not only from a simple need to identify staff members, along with visitors and patients, but security within such establishments as hospitals, primary care and healthcare centres, has become a key concern. It is imperative that staff can move freely within their allocated areas, whilst ensuring unauthorised persons do not gain entry.

Payne Security, with their many years of experience and maintaining a close liaison with this industry sector understands how important ID cards are. When working within the community, ID is a particular concern. Staff ID needs to be clear, concise and difficult for fraudsters to copy. ID cards from Payne Security meet these criteria.

Payne Security can offer complete ID card solutions that suit all your needs. Should you wish to issue cards yourself, we can provide our sophisticated **IDPro7 software** and **ID card printers** to streamline this process for you.

Alternatively, take full advantage of our **card production** and **fulfilment facility** and let Payne Security take the hassle out of the collation of data and issuing your ID cards. Saving you valuable staff time, money and resources.

As many of our customers are changing to **"mix and match"**, let Payne Security manage the bulk card mailings and you manage the smaller ongoing card issuing. At Payne Security we are dedicated to providing you the most cost effective and efficient use of your resources and budgets.

Payne Security offers:

- Highly personalised photo ID cards
- Secure print features to your ID cards
- A more secure and durable card
- Fulfilment services - card mailed direct
- Bulk card management - taking the hassle from you
- IDPro7 photo ID card production software
- Card printers for onsite issuance
- Card accessories

With ever demanding service levels and technology improvements, ID cards can help improve your systems, services and procedures. By making use of the various card technologies and new solutions now available, the ID card can become a multifunctional tool providing you, your staff, visitors and patients numerous benefits.

Not just an ID card, but also a multifunctional tool, linking Access control, Vending, Payment and much more.
