Complete Card Management Solutions

Local Authority and Government Cards

Local Authority and Government Cards

Payne Security has **over 30 years experience** within the **ID card market** and it is with this wealth of experience that they provide a range of **ID and non-ID card** solutions to suit all government sector card requirements.

We understand the difficulties faced by government and many local authorities. A range of professions within the various sectors require ID cards; **councils, emergency services, prison services etc** and they all have different needs.

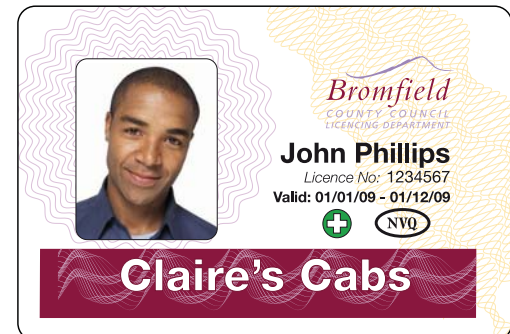

It is, however, imperative that identification of staff is available at all times to ensure an official and approved person is undertaking the job in question. We know that collating data for such cards, including photos, is not an easy task. So easing the collection of cardholder details, including photographs and the ability to incorporate any of the current card technologies, along with offering secure print features, means **Payne Security produce ID cards that are more secure, durable and functional.**

Payne Security not only provide ID cards, using its unique digital print facilities, but can also provide complete fulfilment services, managing and mailing cards directly to your staff, customer or central facility.

As a leading supplier of in-house ID card printers and utilising our sophisticated IDPro7 software, we can also provide you with the on-site card print and issuing system that suits all your ID card requirements.

Payne Security gives you the advantages of:

- Short to medium print runs - it's our forte!
- Secure print features - guilloche, UV print, microtext and optically variable devices
- All print encapsulated under top laminate - more durable and secure card
- Personalised data added at time of print - no additional process
- Multiple designs printed simultaneously
- Quick turn-around times - days not weeks
- All card technologies - magnetic stripe, barcode, RFID (contactless), Smart (chip)
- Braille - meeting the DDA legislation
- Complete card fulfilment service
- Mailing cards direct to cardholder
- IDPro7 facilitates data capture and validation
- A multifunctional tool for the cardholder
- Large format ID cards available - easier to read

Whatever your card scheme needs, Payne Security has the solution to match.

Local Authority and Government Cards

ID Cards

The issuing of **ID and non-ID cards** within the government sector has grown dramatically. With ever growing concerns on security, the need to identify staff members is imperative.

Payne Security, with their many years of experience and maintaining a close liaison with this industry sector understands how important cards are and the benefits they can offer to both your staff and customers.

With many staff members working within the community, ID is a particular concern. Staff ID needs to be clear, concise and difficult for fraudsters to copy. ID cards from Payne Security meet these criteria.

Payne Security can offer complete card solutions that suit all your needs. Should you wish to issue cards yourself, we can provide our sophisticated **IDPro7 software** and **ID card printers** to streamline this process for you.

Alternatively, take full advantage of our **card production** and **fulfilment facility** and let Payne Security take the hassle out of the collation of data and manage your

complete card scheme, mailing cards direct to cardholder or a central facility. Saving you valuable staff time, money and resources.

Or as many of our customers are changing to, **"mix and match"**, let Payne Security manage the bulk card mailings and you manage the smaller ongoing card issuing. At Payne Security we are dedicated to providing you the most cost effective and efficient use of your resources and budgets.

Payne Security offers:

- Highly personalised photo ID cards
- Secure print features to your ID cards
- A more secure and durable card
- Fulfilment services - card mailed direct
- Bulk card management - taking the hassle from you
- IDPro7 photo ID card production software
- Card printers for onsite issuance
- Card accessories

With ever demanding service levels and technology improvements, cards can aid the efficiency of your various systems, services and procedures. By making use of the various card technologies and new solutions now available, the ID card can become a multifunctional tool providing you, your staff and customers with numerous benefits.

Not just an ID card, but also a multifunctional tool, linking Access control, Bill payment, Resident and leisure facility use and much more.
